OYEBIMPE MICHAEL OLUWADARASIMI

Full-Stack Web Developer & Tech Entrepreneur

mickeyoyebimpe@gmail.com | Telegram @YOUNGDHOOM

PROFILE

I design and ship complete web products — from pixel-tight interfaces to real-time backends, databases and payment flows. I also build and run my own software ventures.

TECHNICAL SKILLS

Frontend: React, Next.js, TypeScript, Tailwind CSS, Responsive UI systems

Backend: Node.js, Express, REST APIs, Authentication, Payment workflows

Databases: PostgreSQL, Supabase, MongoDB, Schema design, Row-level security

Real-time: Socket.io, Live feeds, Presence & chat, Automated pipelines, Webhooks

EXPERIENCE & JOURNEY

2025 — Present — Founder, CyberCast (Entrepreneurship)

Founded and shipped a movie discovery product: architecture, API integrations, automated pipelines, auth and payment workflows, plus growth and product direction.

2024 — Present — Full-Stack Web Developer (Freelance) (Engineering)

Building production web applications for clients and personal ventures — React and Next.js frontends on Node.js APIs, with PostgreSQL, Supabase and MongoDB behind them.

2025 — Creator, Young Sphere (Product)

Designed and engineered a real-time social networking platform with Socket.io messaging, live feeds and a complete authentication system.

2024 — EdTech & Developer Tooling (Engineering)

Shipped a CBT exam-practice platform for Nigerian standardized exams and a browser-based PDF editing suite used for everyday document workflows.

Ongoing — Technical Content Creation (Community)

Writing and producing developer-focused content — walkthroughs, documentation and teaching material that turns complex engineering into plain guidance.

SELECTED PROJECTS

Young Sphere — Creator & Lead Developer (2025)

Real-time social networking platform

- Socket.io messaging with typing indicators, delivery states and presence
- Personalised feed with posts, reactions and threaded comments
- Secure auth with sessions, protected routes and profile management
- Optimised data layer for low-latency reads on hot feeds

Stack: React, Node.js, Socket.io, PostgreSQL, Auth

CyberCast — Founder & Full-Stack Developer (2025)

Movie discovery app with automated content pipelines

- Custom integrations with multiple third-party movie data sources
- Automated ingestion pipelines keeping the catalogue fresh
- Supabase authentication with role-based access
- Subscription and payment workflows with verified callbacks

Stack: Next.js, Supabase, API Integration, Payments, Automation

CBT Practice Application — Full-Stack Developer (2024)

Exam prep platform for Nigerian standardized exams

- Topic and subject filtering across large question banks
- Accurate countdown timers with auto-submit and resume safety
- Dynamic question delivery and randomisation per attempt
- Instant scoring with performance analytics by topic

Stack: React, Node.js, MongoDB, Timers, EdTech

PDF Editor & Tools — Developer (2024)

Browser-based PDF editing and manipulation suite

- Merge, split, reorder and rotate pages with live previews
- Text and annotation layers drawn directly on the document
- Client-side processing for privacy and instant results
- Drag-and-drop workflow tuned for mobile and desktop

Stack: JavaScript, PDF-lib, Canvas, Client-side

SERVICES

Full-Stack Web Development: Complete products from first sketch to deployment: interface, API, database, auth and release.

API Development & Integration: Clean, documented APIs — and reliable integrations with the third-party services your product depends on.

Technical Content Creation: Developer content that actually teaches: tutorials, docs and explainers with working code.
